- Michigan State Police
- Community Engagement and Outreach Section, Division of Environmental Health
- Other CMS Healthcare Types

Region 2 North Healthcare Coalition is a 501(c)3 nonprofit organization, under the guidance of the Administration for Strategic Preparedness and Response (ASPR), and the Michigan Division of Emergency Preparedness and Response (DEPR), working to implement the activities of the National Healthcare Preparedness Plan (HPP). We are the second most populous of the 8 regional healthcare coalitions in the State of Michigan. Our focus is to assist community partners in Macomb, Oakland and St. Clair counties in preventing, mitigating, planning/preparing, responding and recovering in disaster and emergency situations.

What are Healthcare Coalitions and what do we do?

Healthcare Coalitions are a collaborative network of organizations (Hospitals, Public Health, Emergency Management, EMS, and many others) consisting of public and private response partners. They serve as a multiagency coordinating group (MAC) that assists in responding to disasters and emergency situations through communication and coordination. They focus on relationship building and collaboration, to develop and facilitate a coordinated healthcare response to disasters and emergencies in an all-hazards approach, while utilizing resources and healthcare preparedness to meet the health and medical needs of the community during an emergency.

Region 2 North

Why?

Through preparing with community partners, we have been able to assist in multiple disaster and emergency situations that exceed the day-to-day capacity of our local healthcare and emergency response systems, resulting in lives saved.

These include but are not limited to:

- Public Health Emergencies
 - (H1N1, COVID, etc.)
- Cyber Attacks
- Water disruptions
- Power Outages
- Communication Disruptions
- Natural Disasters
- School Shootings
- Mass Casualties
- Opioids
- Political Unrest
- Terrorism (Anthrax)
- Explosions
